Art Unit: 3751

1. Claims 1-5 are rejected as failing to define the invention in the manner required by 35 U.S.C. 112, second paragraph.

The claim(s) are narrative in form and replete with indefinite and functional or operational language. The structure which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a complete operative device. The claim(s) must be in one sentence form only. Note the format of the claims in the patent(s) cited.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-5, as best understood, are rejected under 35 U.S.C. 103(a) as being unpatentable over Vidal.

The Vidal reference (Figs. 4 and 6) discloses a hair clogger stopper comprising a flat base 5 including trapping posts 25 and suction cups 6.

Re claim 1, the hair clogger stopper is intended for use with bathtub drains (col. 8 lns. 19-21). The choice of hair clogger stopper size would appear an obvious choice to be made.

Re claim 2, the base is rubber (col. 7 ln. 35). The choice of percentage of rubber would appear an obvious choice to be made.

4. Applicant is referred to MPEP 714.02 and 608.01(o) in responding to this Office action.
